

Rolcon Tapered Rollers

Rolcon offers a complete line of tapered rollers to meet many different applications. The rollers are available in two different sizes.

New FS2 Series Ultra Quiet...NO frame Wear

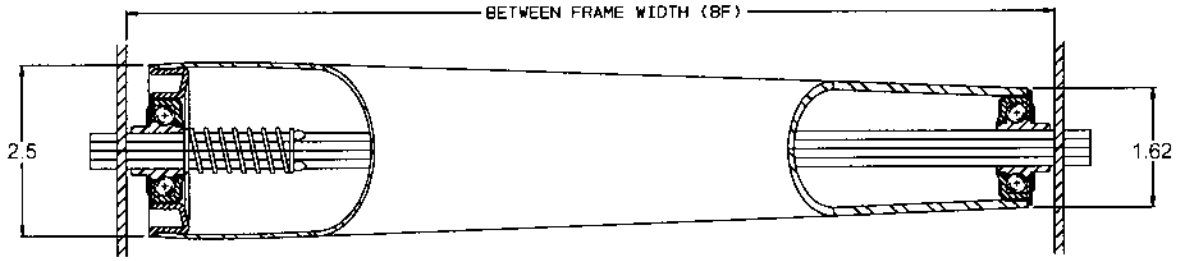

The FS2 Series tapered is a new roller that drastically reduces noise AND totally eliminates frame wear. Available in 2.5" 14 gage tubing tapered down to 1 5/8" or 1.9". The axle is a 7/16" hex sleeve that is connected by a 1/4" connecting rod. The axle sleeve is made out of a proprietary polyurethane material that is guaranteed not to wear out the conveyor frame and combined with the ABEC-1 bearing provides the MOST QUIET roller on the market.

RS Series

The RS Series roller is a standard tapered roller that is made of 2.5" 14 gage tubing tapered down to either 1 5/8" or 1.9" on the small end. The through steel axle is available in 7/16" hex and is supported by ABEC-1 precision bearings for smooth, quiet operation.

Product Brilliance

Tapered Roller 2 1/2 in. O.D. to 1 5/8 in. O.D. - 7/16 Hex Axle Precision Bearing

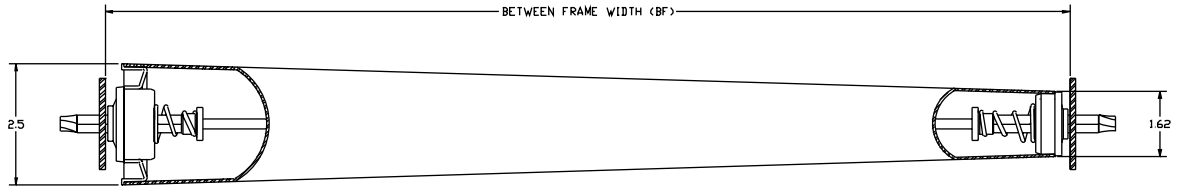

► Description

Tube: 2 1/2 in. O.D. to 1 5/8 in. O.D.
x 14 Ga.
Axle: 7/16 in. Hex
Bearing Assembly: R1625ZZ, R3135
Between Frame: 12-40 in.
Options: See page 35
Part Number: 2516_RS-1/(options)
